SUMMARY

Full Stack Developer with four years of experience building and maintaining TypeScript, Node.js and React applications for a production SaaS on Google Cloud, used by 30,000+ clinics. Delivered 80+ features and resolved 1,600+ support tickets in the platform's financial module, introduced automated testing (Jest/TDD) to the team, and now lead the module's migration to a micro-frontend architecture. Currently lead a 6-developer team and am pursuing a Software Engineering degree at UNINTER.

PROFESSIONAL EXPERIENCE

Tech Lead · Clinicorp Solutions · Apr 2026 – Present

- Lead a team of 6 developers (1 junior, 4 mid-level, 1 senior) within a 10-person squad, while contributing hands-on as the top committer of the new financial micro-frontend (54% of its commits)
- Own technical decisions and code quality for the squad, having reviewed 800+ pull requests since 2023
- Architected and stood up the new financial module as a TypeScript micro-frontend (React, Vite) and lead its incremental migration off the legacy JavaScript module: two screens (checking account, NFSe issuer setup) live in production, six modules under way and 200+ test files in the new codebase
- Automate the squad's workflow with Claude Code: built a pull request review skill (blind oracle, nine specialized analyzers, adversarial pass), a twice-daily regression radar over support tickets reporting to Google Chat, and skills for branch closing, preview deploys and UI test runs; contribute to the engineering team's internal plugin marketplace

Full Stack Developer · Clinicorp Solutions · Feb 2022 – Apr 2026

- Delivered 80+ features in the financial module of a SaaS used by 30,000+ dental clinics and 200,000+ active users, authoring 290+ merged pull requests in React, Node.js and TypeScript on Google Cloud (Datastore, Pub/Sub) within a Scrum/Kanban squad
- Refactored and maintained legacy code, resolving 12 technical debt items and fixing around 100 bugs across the system
- Drove adoption of automated testing (Jest/TDD), creating and maintaining 30+ test suites across nearly 40 pull requests to improve code reliability and maintainability
- Resolved 1,600+ production support tickets in the financial module, debugging with Grafana, Loki and Google Cloud logs and reprocessing Pub/Sub messages in production
- Built and maintained integrations between the financial module and four external systems: the in-house fintech, Saúde Service (card payments), Focus (NFSe issuing) and CDL/SPC (credit lookups and SPC debt registration)
- Authored the financial module's observability dashboards in Grafana over Prometheus, Loki and Tempo, used by the squad for dashboard and alert monitoring

Development Intern · Clinicorp Solutions · Dec 2021 – Feb 2022

- Fixed bugs and delivered minor improvements to the production system

EDUCATION

Bachelor's Degree in Software Engineering · UNINTER - Centro Universitário Internacional · Feb 2025 – Present

- In-depth knowledge in software planning, development, and maintenance
- Proficiency in project management, architecture, and testing

Technical Degree in Systems Development · SENAI - Serviço Nacional de Aprendizagem Industrial · Mar 2021 – Jul 2022

- Introduction to the fundamentals of software development

PROJECTS

voting-api · github.com/LeonardoMonteiroo/voting-api

- Backend in Node.js and TypeScript: REST API with Fastify, Prisma, Docker, Zod, and WebSocket.

transactions-api · github.com/LeonardoMonteiroo/transactions-api

- REST API in TypeScript using Fastify and Knex.

habits-manager · github.com/LeonardoMonteiroo/habits-manager

- Full-stack habit-tracking application (web and mobile) built with TypeScript.

SKILLS

Programming Languages: TypeScript, JavaScript, SQL
Backend: Node.js, Fastify, REST APIs, WebSocket, Zod, ORM (Prisma, Knex)
Frontend: React, Vite, Micro-frontends, HTML5, CSS3
Databases: Google Cloud Datastore (production), BigQuery, PostgreSQL, NoSQL
DevOps & Cloud: Google Cloud Platform, Google Cloud Pub/Sub, Docker, CI/CD, Grafana (Prometheus, Loki, Tempo)
Testing & Quality: Jest, TDD, Code Review, SOLID, Clean Code
Tools & Agile: Git, GitHub, JIRA, Scrum/Kanban

LANGUAGES

Portuguese: Native speaker • English: C1 certified (EF SET) • LIBRAS (Brazilian Sign Language): Intermediate

COURSES & CERTIFICATIONS

SOLID Principles (Udemy), Assertive Communication (Udemy), SQL for Data Analysis (Data Driven School)
